

THE SAVA RIVER WATERWAY MARKING SYSTEM MAINTENANCE

- **Employer:** BiH Ministry of Communications and Transport
- **Constructor:** Geo-projekt SM d.o.o. Sremska Mitrovica
- **Supervision:** Institut za građevinarstvo „IG“ d.o.o. Banja Luka
- **Project Value:** BAM 714,846.60 KM
- **Source of Financing:** Budget of Bosnia and Herzegovina
- **Project Commencement Date:** 01 January 2019 (Three-year framework agreement signed with the Constructor)
- **Project status:** in implementation phase until 31 December 2021.
- **Project Description:** Works and supervision over works on the Sava River waterway marking system maintenance from 211 rkm to 343 rkm on both banks and from 178 rkm to 211 rkm on the right bank.

Under the 2008 Plan on the marking of the Sava River and its navigable tributaries regulating navigation on the Sava River, Bosnia and Herzegovina in 2009 completed the works on marking the right bank of the waterway from 178 rkm to 211 rkm (on the BiH side at the section where the Sava River constitutes the border between BiH and the Republic of Serbia), as well as both banks of the waterway from 211 rkm to 343 rkm (BiH and Croatian side). From that time onwards, a Constructor is hired to perform maintenance of the marked waterway. The maintenance of the existing Sava river waterway marking system includes: waterway control, clearing of vegetation, kilometre and costal markings

cleansing; procurement, replacement or repairs of damaged or stolen kilometre and costal markings, buoys and floating markings; painting and storing kilometre and costal markings, buoys, floating markings and spare parts in order to maintain the reached navigability level as a precondition for further development of the Sava River basin transport.
